SAVINGS
MADE SIMPLE

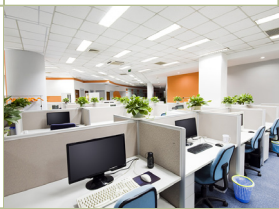

STREET LEGAL

High Performance Infrastructure Support Services

Street Legal is an Authorized Simple Control Technology Distributor

We deliver unique and creative solutions that lead to tangible economic growth in your business, practice or organization

TECHNOLOGY PROFILE

Introduction:

Simple Control is a computer-based energy saving system that monitors and controls a facility's lighting, HVAC and water heating with real-time energy monitoring of a customized conservation strategy.

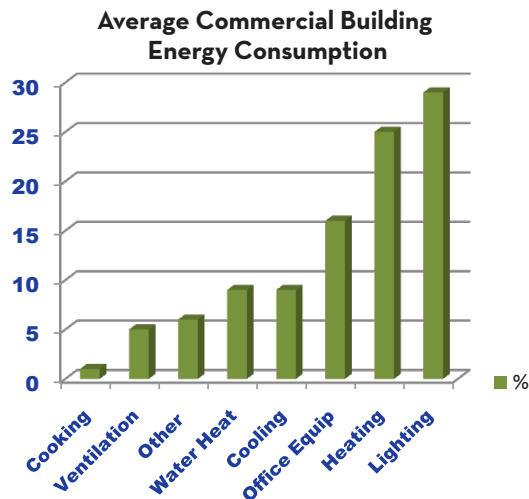

Benefits of Simple Control:

- Guaranteed Savings
- Up to 25% Utility Bill Reduction
- Federal, State, and Utility Initiative Qualification
- \$1 investment in energy efficiency upgrades yields \$2-3 in asset value

Making Commercial/ Industrial Facilities:

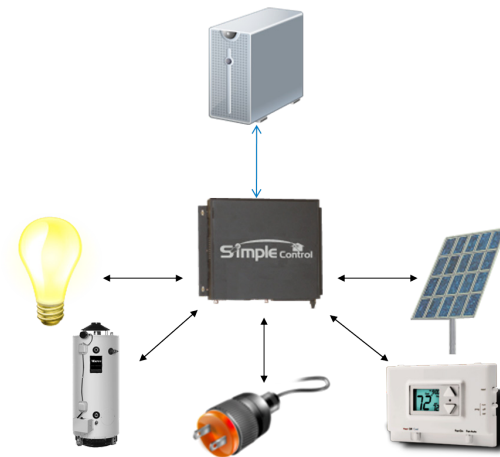

- Energy Efficient
- Productive
- Green

Energy costs have risen 40% over the last 10 years and are expected to climb 9% in the next 2 years. Real-time energy monitoring combined with intelligent control can eliminate as much as 25% of the energy used. In addition, Simple Control qualifies for a federal tax deduction as well as other incentives. Green Financing programs can mean no upfront costs.

The Simple Control Solution:

- Proprietary SC Algorithms[®] continuously monitor environmental characteristics of HVAC systems, lighting, and water heating for increased building efficiency and occupant comfort
- Secure wireless communication eliminates the need for IT networking or wiring
- Real-time performance monitoring and reporting allows for more efficient energy saving strategies and maintenance response times
- The technology provides the ability to network multiple buildings

Why Choose SIMPLE Control?

Our systems can pay for themselves by reducing costs, enhancing profits, and boosting asset values:

- Recover energy costs and improve cash flow
- Lower capital expenses through better utilization of your current infrastructure
- Streamline maintenance, increase up time, and identify the root causes of excessive power usage
- Simplify your energy budgeting/ forecasting and reduce volatility
